

BAR ASSEMBLY

Parts List

- 1 Bar
- 2 El Grande mounting corbels
- 1 2 x 6 spacer.

Remove the window spacer from the bottom of the window which will have the bar and insert the 2 x 6 spacer between the stationary windows. Screw into place along the skirt and sides.

Place the bar so that the notch is flush with and evenly spaced around the window opening. Screw down through the bar top into the spacer edge. Place the mounting corbels against the bar bottom cleats and screw into the skirt face and up into the bar bottom.

The bar assembly may be ordered separately from the gazebo. The bar is manufactured to mount in the 100" wall of the gazebo so that the movement of the sliding windows will not be hindered. When a bar is installed, a screen will not fit in the same window section.
